# COMPREHENSIVE LABORATORY ANALYSIS

For everyone who would like a comprehensive assessment of the laboratory results of their health state.

DIAGNOSTIČNI CENTER BLEĐ

For a healthy and enjoyable life!

## COMPREHENSIVE LABORATORY ANALYSIS

Opt for a package of laboratory blood and urine tests designed for everyone who would like an assessment of what blood and urine say about their health. You merely need to submit a blood and urine sample. You will receive an analysis of **30 different indicators**.

- **Haematological tests:** comprehensive blood scan – haemogram with a differential blood count (18 different parameters), sedimentation
- **Urine examinations (stix):** indicator of the urinary system function
- **Biochemical tests:** liver condition indicators (AST, ALT, GGT, AF, bilirubins), electrolytes in blood (potassium, sodium, chlorine, calcium, phosphorus), indicators of the state of kidneys (urate, creatinine, uric acid), pancreas test (amylase, lipase), blood sugar, blood fats (triglycerides, cholesterol: HDL and LDL), other parameters (CK, LDH, iron, proteins, albumins), markers of inflammation (CRP)
- **Other examinations:** thyroid hormone (TSH)

The indicated tests are used to determine the full blood count, hepatic, kidney and pancreatic as well as thyroid function while also evaluating the electrolytic balance, blood iron, glucose and cholesterol levels.

Based on any deviations from the reference values, we will recommend which specialist you should consult for further examinations. You will receive written results by mail to your home address within 7 days.

**The sampling shall be carried out on an empty stomach.**

---

Under the Slovenian ZDDV-1 Act the VAT (value added tax) is not charged for medical services.

PRICE: **€92.00**

Additional fee for the recommended additional examinations for persons above the age of 40 years:

- men and women: blood coagulation indicators – prothrombin time (INR): €5
- men: specific antigen for prostate cancer (PSA): €12
